

# Enterprise-Grade Security. Legal-Grade Privacy.

Security designed for the pace and precision of modern legal work. Every layer of Irys is built to protect privileged, regulated information.

## Zero Data Retention

- Your data is yours – we never store or train on it.
- Aligned with the strictest privacy ethics, including reviewing applicable bar opinions and ethics guidance.
- No customer inputs used for training, modeling, or analytics of any kind.

## End-to-End Encryption

- Data encrypted in transit (TLS 1.2+) and at rest (AES-256).
- SOC 2, ISO 27001, GDPR, and CCPA-aligned infrastructure.
- Hardware security module (HSM)-backed key management.

## Audit Trails & Access Logging

- Complete, immutable record of access, changes, and activity.
- Role-Based Access Control (RBAC) down to matter and document level.
- Searchable, exportable logs for compliance audits and dispute resolution.

## Identity & Access Management

- Single Sign-On (SSO) via SAML 2.0 and SCIM provisioning.
- Automated user lifecycle management synced to your identity provider.
- Granular permissions for multi-tenant enterprise deployments.

## Deployment Flexibility

- Cloud, Virtual Private Cloud (VPC), or fully on-premise deployment.
- Tailored for firms with strict internal IT and compliance requirements.
- Customer-dedicated encryption keys available for VPC and on-premise clients.

## 24/7 Monitoring & Incident Response

- Automated threat detection and anomaly alerts around the clock.
- Client notification within 24 hours of confirmed incident. Full post-mortem within 5 business days.
- Proactive vulnerability scanning and patch management.
